# MHD ALGHAZOULI

678-794-7091 | mhdalghazzouli@gmail.com | Atlanta, GA
**Portfolio**: https://mhdalghazouli.github.io/ **| GitHub:** https://github.com/mhdAlghazouli
**LinkedIn**: https://www.linkedin.com/in/moe-alghazouli/

Experienced Software Engineer with 2+ years' expertise in JavaScript, React, React-Native, Node.js, and more. Proven leadership and successful project delivery. With a passion for shaping the future of technology, I am confident that I will be a valuable addition to your team.

## SKILLS

**JavaScript, React, Redux, React-Native, TypeScript, Node.js, Express.js,  SQL, PostgreSQL, Sequelize, MongoDB, Mongoose, HTML, CSS, BootStrap, Bulma, REST API, Atlassian Jira, Git.**

## PROFESSIONAL EXPERIENCE

**Software Developer**                                              March 2019 – June 2022
*RefCode*                                                                        *Atlanta, GA*
- Worked with cutting-edge technologies like React and Typescript to build robust and user-friendly web applications.
- Possessed a solid foundation in web application development, understanding the full stack and having a keen eye for detail to deliver high-quality, bug-free code software solutions that meets the company's standards.
- Mentored students in HTML, CSS, and JavaScript, fostering the growth of aspiring software developers.

## PROJECTS

**Quacker (React, Node.js, Express, Sequelize, ElephantSQL, React Bootstrap, Multer, JWT)**
*A social media app. Modeled after Twitter.*
*https://github.com/mhdAlghazouli/quacker-client*
- Developed components with ReactJS, Node.js, and Express for post querying and interaction.
- Integrated user authentication and implemented a user-friendly comment and like system.
- Ensured seamless user experience across devices with responsive React Bootstrap design.

**Adidas E-Commerce mobile app clone (React-Native, REST API, MongoDB, Mongoose, JWT)**
*An online clothing e-store offering apparel tailored for various forms of restorative workouts.*
*https://github.com/mhdAlghazouli/adidas-client*
- Developed a comprehensive React Native application cloning adidas mobile app, featuring user authentication using MongoDB and Mongoose, enabling seamless signup, login, and logout functionalities.
- Implemented user-friendly features for managing product preferences, including adding/removing favorites and seamless checkout with customizable options.
- Streamlined the user experience by enabling modifications to product details such as size, color, or quantity directly from the bag page, providing a convenient and intuitive shopping experience.

**To-do List (Node.js, Express, JavaScript, MongoDB, Mongoose, EJS, Bulma, CSS, JWT)**
*A simple to-do list app for simple lives.*
*https://github.com/mhdAlghazouli/backend-project*
- Developed a secure to-do list app with authentication and database connectivity.
- Implemented user roles and permissions for differentiated access levels and functionality.
- Ensured data security through the incorporation of encryption techniques for user information and task details storage.

## EDUCATION

**Web Development** - Digital Crafts                                             Jan 2023
*Full-Stack Development bootcamp*
**Business Administration** - Future University in Egypt                         Jan 2015
*B.A. in business administration*
